

## PAIR OF WIFI SELF-POWERED TWO-WAY IN-CEILING SPEAKERS WS 220

### Description

This pair of self-powered two-way speakers (active + passive) can receive music from online streaming applications such as Spotify, Tunein, etc or from local storage devices (computer, tablet, Smartphone, NAS ...) and make it sound synchronized in all rooms or send different music to each room. And all controlled from a free app of intuitive use and easy configuration available in multiple languages for both iOS and Android.
